DIEBOLD ELECTRONIC SECURITY LAUNCHES MOBILE FUNCTIONALITY TO SECURESTAT® PLATFORM
Enhancements to be unveiled at the 2015 ASIS International Seminar and Exhibit

NORTH CANTON, Ohio, Sept. 28, 2015 /PRNewswire/ -- To enable anytime, anywhere access to advanced video monitoring and services, Diebold, Incorporated (NYSE: DBD) is launching its latest mobile and snapshot functionality to its software-as-a-service platform, SecureStat®. These enhancements enable SecureStat users to quickly gain access to data, functionality and results—in order to improve security management and business operations—wherever they may be.

The latest enhancements are built off a mobile mindset to provide seamless responsive mobility and complete portal functionality to customers that are on the go. Users can access their account on any smartphone or tablet, regardless of the operating system.

"Diebold's philosophy to quickly pioneer solutions that exceed customer expectations via SecureStat's nimble open application programming interface (API) have enabled swift implementation and adoption of new features, functionality and enhancements," said Jeremy Brecher, Diebold electronic security, vice president, technology. "This makes the SecureStat platform more fluid and highly adaptable to the current and future security needs of our customers."

In addition, SecureStat has a newly upgraded and time saving dashboard feature, snapshot, which enables users to immediately view the status of the monitoring, service and installation of equipment at their facilities. With one-click access, snapshot provides customers the ability to quickly survey important data, drill-down for more information and take action when needed.

Since SecureStat's introduction in 2013, it has received very positive feedback from business customers in a number of different markets and has helped drive Diebold's electronic security business unit's total recurring monthly revenue (RMR) to approximately $7 million in North America. Customers are using it to improve security management and business operations, supporting the multitude of services they receive from Diebold.

"Diebold's SecureStat platform is an invaluable resource," says David Fitzpatrick, supply chain manager, AIDS Healthcare Foundation. "From the ease-of-use, real-time data, passcode management, incident reporting, and remote video viewing - this service allows my team to get the information they need quickly and respond accordingly."

The responsive mobility and snapshot functionalities are available now to SecureStat users. Diebold electronic security will showcase these enhancements, in addition to its recently

announced Site Sentry® cloud video services, at booth #1901 on Sept. 28 – Oct. 1 at the 2015 ASIS International Seminar and Exhibit in Anaheim, Calif.
